

# QuickStrap™

## OPERATING GUIDE

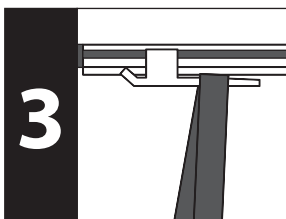

THIS SIMPLE AWARD WINNING SYSTEM IS SO EASY TO USE

**1** RELEASE REQUIRED LENGTH OF STRAP FROM THE WINCH AND FIT STRAP OVER THE SPECIALLY DESIGNED STRAP HOOK POLE.

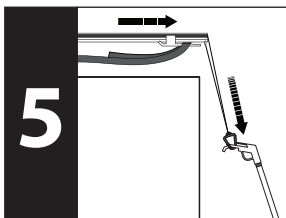

**2** USE THE HOOK TO RAISE THE STRAP UP TO THE YELLOW CARRIAGE.

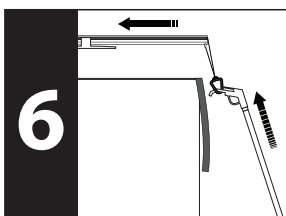

**3** PLACE THE STRAP OVER THE YELLOW CARRIAGE.

**4** ONCE ALL PALLETS ARE LOADED GO TO THE OPPOSITE SIDE OF THE VEHICLE AND RAISE THE HOOK INTO THE GREEN HOOP.

**5** PULL THE HOOP DOWN QUICKLY, APPROXIMATELY 1 METRE. THIS WILL LAUNCH THE YELLOW CARRIAGE ACROSS THE BEAM HITTING THE REBOUND SPRING AND CATAPULTING THE STRAP OVER THE LOAD READY TO PULL DOWN AND SECURE AS USUAL.

**6** SLOWLY RAISE THE GREEN HOOP AND THE YELLOW CARRIAGE WILL RETURN TO THE OTHER SIDE OF THE VEHICLE AUTOMATICALLY, READY FOR THE NEXT LOAD.

WHEN SAFETY MATTERS

# QuickStrap™

## OPERATION SAFETY BENEFIT

The **Quickstrap Slide Track** has been manufactured in Australia by using the latest in self-lubricating and flexible material, which protrudes from the side of the slide track. This ensures protection for the slide.

This inexpensive yet practical solution for load security will reduce loading times, and the risk of injury to the operator and equipment damage where some operators have had strap hooks hitting and damaging roofs.
